## Vocal Communication Birds Catchpole Clive

**vocal communication in birds - umass amherst** - birds can adjust the targets of song learning during sensorimotor development. birds normally reproduce, with impressive accuracy, song models they had memorized previously. however, under some 390 vocal communication in birds encyclopedia of neuroscience (2009), vol. 10, pp. 389-396 author's personal copy **chapter 7 avian vocal production in noise - researchgate** - problem of acoustic communication in noise has also led to the evolution of one shared solution in birds: the lombard effect, i.e. a noise-dependent regulation of vocal amplitude. **masking experiments in humans and birds using ...** - signals in birds, for instance, are important for territory defense and mate attraction (catchpole and slater 1995), diminishing the birds reproductive success and survival when vocal communication efficiency is reduced by marked increases in noise. r. j. dooling (\*) s. h. blumenrath **chorus-call classification in the southern pied babbler ...** - 694 chorus-call classification in the pied babbler figure 1. spectrograms and waveforms of call types during choruses. (a) a duet by a breeding pair, male using type vii and female type ii, (b) one individual changes from call type v to type iv during the chorus, with call type ii in the background, (c) multiple individuals chorusing at the start, with breeding pair in a duet using call types ... **individual identification on the basis of the songs of the ...** - guaranteed by their vocal communication. hence, individual birds could be identified by features of their vocalizations. our aim was to reveal the vocal individuality in the asian stubtail. first, we tried to find out whether this species shows vocal individuality. second, by carrying out dis- **how do birds sing? - citeseerxtu** - 1988). the animals best known for their vocal virtuosity are birds (catchpole & slater, 1995). birds use acoustic signals extensively to communicate, which is important in species recognition, sexual selection and consequently in speciation (kroodsmma & miller, 1996). in order to reproduce, **effect of noise on vocal behaviour, physiological systems ...** - pathways (fig. a), by disrupting communication, by impacting physiological systems via stress, and by interfering with development. in turn, each of these systems can be interconnected, and may affect the others, resulting in both direct and indirect effects on the fitness of birds. 1. noise may have an impact on vocal communication. **the origins and diversity of bat songs - researchgate** - delineated in birds (marler and slabberkoorn 2004; catch- ... bats to enhanced spectrotemporal complexity in their vocal communication behaviors more so than other mammals. ... catchpole and ... **chapter 5 song: the learned language of three major bird ...** - abstract vocal learning has evolved several times independently in mammals and three major orders of birds. of these only hummingbirds and passerine birds have complex songs, whereas the large vocal repertoires of parrots comprise various call types associated with different behavioral contexts. generally, bird song has two **reviews vocal mimicry in songbirds - department of biology** - baylis (1982, acoustic communication in birds, academic press) decried the serious lack of experimental verification for the various hypotheses proposed to explain vocal mimicry in songbirds. with few exceptions, our understanding of the function and acquisition of this fascinating behaviour seems to have scarcely progressed. **498 short communications [auk, vol. 106** - 500 short communications [auk, vol. 106 table 1. discrimination of chatter-calls by birds in- side burrows. with response without playback male female responses male call (a) 52 0 31 (b) 12 0 9 female call (a) 0 37 45 (b) 0 11 19 according to catchpole (1982), diurnal seabirds are
